• Glass containers and jars
• Non-returnable glass bottles
• Labels and fasteners do not need to be removed.

Not these!

• Plastic bottles and containers
• Ceramics, porcelain and crystal
• Window panes, mirrors, laminated glass
• Light bulbs and any kind of lamps
• Laboratory glass

Lassila & Tikanoja Oy collects glass waste produced at real estate owned by Aalto University Campus and Real Estate (ACRE). The glass waste is transported to a recycling plant in Kerava, where it is used to produce new glass containers, glass wool and foam glass.

Note! Porcelain, crystal glass, mirrors, window glass and heat-resistant glass belong in mixed waste, not in glass waste.
