Lassila & Tikanoja Oy collects paper waste produced at real estate owned by Aalto University Campus and Real Estate (ACRE). The paper waste is transported to a recycling plant in Kerava.

It is used as raw material for newsprint. Office paper is sorted separately to be used in the manufacturing of tissue paper.

Please sort sensitive and confidential documents in their own bin for data-secure disposal – shredded paper does not qualify as paper waste due to its structure and is to be sorted as energy waste.
