

Questions and Answers

What happens if Teacher changes/deletes a MyCourses calendar event which has been created via Oodi?

Once every night the MyCourses Calendar event's type, room, building, subject and time are overwritten with current Oodi information. However, if modified by teacher, the event's description will not be overwritten. In other words, if somebody deletes/modifies an Oodi-generated calendar event, it will come visible again in 'Oodi-form' the next day; excluding the event's MyCourses-description field.
