

What is Panopto

“Panopto is the centrally managed multimedia capture solution recently adopted at Aalto. With Panopto you can easily record and share knowledge and information – presentations, instructions, lectures, screencasts, events - live-streaming, etc. from any laptop and it is available for anyone at Aalto.

You may use Panopto to "flip" your classes/practise so that passive learning (listening to lectures) is done online and active learning (solving problems) is done in class/f2f meetings.

Panopto is also video content management system – You can think it as Aalto tube. It's tool for uploading and sharing your educational media. Panopto's video library includes a web-based editor, the industry's most comprehensive search engine system and viewing analytics.

Panopto is originally from Carnegie Mellon University, one of the leading online course providers, and now trusted by over 600 institutions worldwide.
