

Custom Space User Management

Guide to Custom Space User Management

<https://marketplace.atlassian.com/plugins/raju.kadam.confluence.permissionmgmt>

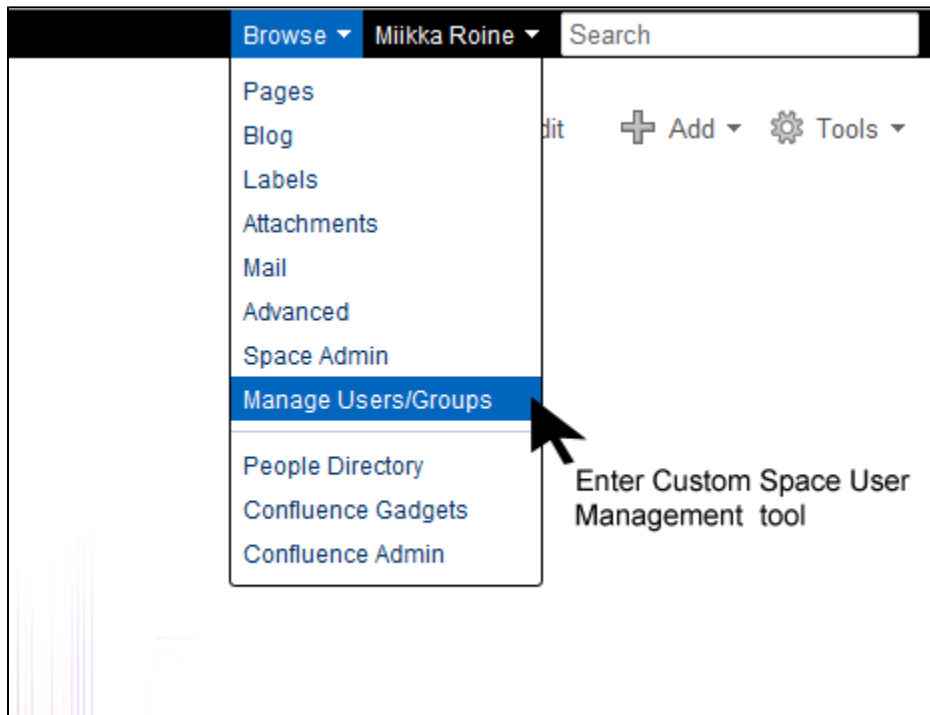

The Custom Space User Management -plugin (CSUM) gives Space Administrators ability to manage users and user-groups associated to their Wiki Spaces.

Using this plugin Space Administrators can:

- Create / delete user-groups that can be space-specific (optional)
- Add / remove users from user-groups associated to given wiki space
- View list of users for selected user-group
- Search users to add / remove from selected user-group (optional)
- Create a user-group with a comma-delimited list of users in a single operation (optional)
- Perform bulk add / remove of users from user-group(s)

Entering Custom Space User Management tool

As space administrator, choose a space from the dashboard or just click on the globe icon next to the space in the dashboard and go to Browse Space -> Manage Users/Groups (tab)

Usage

In this page, you can add a group, add a group and specify users, create multiple groups (enter a comma-delimited list of group names).

Pages | Blog | Labels | Attachments | Mail | Advanced | Space Admin | **Manage Users/Groups**

Webmaster Wiki-ohjeita (wiki) Groups:

wiki-testi

1-1 of 1

Add Group

Entering **superheroes** will create the group
wiki-superheroes

With Users (optional):

Submit

Please note: For a group to be managed within this space, it must satisfy the following requirements:

- The group must have view permissions for this space (wiki)
- The group must match the naming pattern wiki-*

[Bulk Change Tool](#) | [Edit Space Permissions](#) | [Refresh](#)

Change Space:

Webmaster Wiki-ohjeita (wiki)

Change Space

- Select a group if one exists (you can also create a group here if there is not one already - don't worry- you can delete it)

When you have selected or created a group, you can add users into it and modify groups restrictions on current space.

Webmaster Wiki-ohjeita (wiki)

Groups:

wiki-testi
1-1 of 1

Add Group

 Entering **superheroes** will create the group **wiki-superheroes**

With Users (optional):

Edit Group wiki-testi
 [» Confluence Directory Search](#)

Add User(s) to wiki-testi:

 Please enter a comma separated list of usernames
 eg. rb04, nk93, kb85, ts69

No users found in group

Please note: For a group to be managed within this space, it must satisfy the following requirements:

- The group must have view permissions for this space (wiki)
- The group must match the naming pattern wiki-*

[Bulk Change Tool](#) | [Edit Space Permissions](#) | [Refresh](#)

- You can add users to groups by entering a comma-delimited list of usernames (ids).

Important!
 For Aalto usernames you must add the whole username with domain i.e. `username@aalto.fi`

- You can search users by clicking on directory search link.

You can manage your groups permissions either by clicking on "edit space permissions" link at the bottom, or by going to space admin (tab) -> permissions.

Groups

These are the permissions currently assigned to groups for this space.
